Carl Zeiss SMT - Nano Technology Systems division (NTS) offers a broad range of systems based on its core competencies in electron- and particle-beam technology. Among these are scanning and transmission electron microscopes (SEM / TEM) with ultra-high resolution, complemented by CrossBeam® focused-ion beam technology designed for sub-surface 3D volumetric characterization and the new ORION™ Helium-Ion technology offering unrivalled opportunities for sub-nanometer imaging, depth-of-focus capabilities and new image contrast features.
