

## nanoArt Exhibition

We were hosting an artwork exhibition of fourteen gifted artists from literally all around the globe. Main contribution came from Cristian Orfescu, an American based in California, who is an author, producer, coordinator and evaluator of the annually held online competition

[NanoArt 21](#) which started back in 2006 and 2009 is going to be a fourth one in a row. It is certainly the first and most probably still the only online competition/exhibition/festival on NanoArt as such. (For more visit the exhibition slide show [here](#)). Orfescu himself says he considers NanoArt to be an appealing and very effective way to communicate a reflection and usage of the latest technological and social movements with and within general public as well as plain informing about the technologies of the 21st Century. You had a chance to see 20 masterpieces of Cristian Orfescu at the EuroNanoForum 2009.

As outlined above, thanks to Cris Orfescu's kind cooperation we could also present some of the competitors of the above mentioned contest. Namely: Bjoern Daempfling, Carol Cooper, Darcy Lewis, David Derr, David Hylton, Eva Lewarne, Fred Marinello, Chris Robinson, Philip Brun del Re, Renata Spiazzi, Teja Krasek, Ursula Freer.

Last but not least, we were having a very fruitful and nice cooperation with our crucial media partner: "NANO - the Magazine for Small Science", thanks to which, we got to know a very interesting textile artist and scientist Dr. Frances Geesin, whose artworks you were sure to meet at the conference.

We would like to thank all the artists and especially Cris Orfescu as well as our media partner "NANO - the Magazine for Small Science" for the great cooperation.

We hope you have enjoyed the exhibition, as well as the educational show of the nanoTruck!
