

Rob Aitken

is Director of Strategic Consulting at the Institute of Occupational Medicine (IOM) and the Director of the SAFENANO initiative. SAFENANO (www.safenano.org) is one of UK's 23 Nanotechnology Centres of Excellence and has the unique remit to interpret and disseminate the emerging health safety and environmental information about nanoparticles to help industry understand and mitigate the potential risks. He also leads IOM's work programme on nanotechnology risk which currently encompasses eight EU framework projects, a series of major public reviews for Government Departments in the UK and elsewhere as well as other research or consultancy activities. He is also the co-ordinator of SnIRC, www.snirc.org a multidisciplinary research collaboration working on nanoparticle risk issues which also included Napier and Edinburgh Universities.
