

Jean-Philippe Putaud

Scientific Officer. JRC-Ispra EMEP-GAW station responsible.

Obtained in 1993 at Paris (VII) his PhD on 'Dimethylsulfoxide flux, concentration and atmospheric oxidation products', started with a 13-month stay at Amsterdam Is (38°S, 77°E). Short post-doc period (1994) in Stockholm (MISU) dedicated to ppt-level SO₂ monitor development and 3-D modeling practice (MOGUNTIA). Took part to numerous large field experiments (Oceano-NO_x, FieldVOC, EUMELI 3, SOFIA, OMEX, ACE-2, PiPaPO, MINATROC, ESCOMPTE, INTERREG III-Cμ, Krakow project campaign). Current research activity focused on aerosol chemistry and mass closure, aerosol optical properties and radiative forcing. Responsible of the aerosol EMEP-GAW station for atmospheric research at JRC-Ispra since February 2002.
