

Walter Schütz

founder and managing director of FutureCarbon GmbH Born 1967, Walter Schütz studied physics at University of Bayreuth, and made his doctoral thesis in the field of Fullerenes and related Carbon-Nanomaterials in 1997. In 1997 he joined Mannesmann Pilotentwicklung in Munich, the Think Tank of the former Mannesmann Group. There he worked in the field of new energy technologies and new materials. He was responsible for several projects in the field of hydrogen storage, fuel cells and new materials. He was leader of the fuel cell development center of Mannesmann. In 2001, after the take over of Mannesmann by Vodafone he founded FutureCamp as a spin-off company together with two partners. In 2002 he founded FutureCarbon as daughter company of FutureCamp. This company focuses on the development and production of carbon nanomaterials based products.
