

# Stefan Weigel

Dr. Stefan Weigel currently works at RIKILT - Institute for Food Safety , within Wageningen University and Research Centre in The Netherlands, as Senior Project Manager and Deputy Programme Manager for veterinary drugs and contaminants. His main research interests are in the area of trace determination of organic residues and contaminants by means of mass spectrometry and biosensor technology. This spectrum was recently extended to the analysis of nanoparticles in food.

Stefan Weigel graduated in Chemistry (MSc) at the University of Hamburg/Germany where he also obtained a PhD in Analytical Chemistry, working on the ultra-trace analysis of organic contaminants in marine environments, mainly North Sea, with focus on occurrence, distribution and transformation of residues of pharmaceuticals.

At Eurofins | Wiertz-Eggert-Jörissen (Hamburg/Germany), part of the international Eurofins Scientific group, he was responsible for the coordination and management of research and development activities and was head of the Eurofins Technology Transfer and Training Centre.
