

20th ESPD Annual Meeting

12 – 14 May 2021
VIRTUAL

Prof. Dr. Cristina Has

My clinical activity includes general and pediatric dermatology, with focus and genodermatoses. I am internationally recognized for my work on the genetic basis of genodermatoses, in particular of skin fragility disorders. With my group, I have identified new genes and characterized large cohorts of patients with genodermatoses, established genotype-phenotype correlations and explored the underlying disease mechanisms.

2012- Dermatologist, Professor, University Freiburg
2009 Board Exam. Dermatology Germany
2007 Habilitation in Experimental Dermatology, University Freiburg
2003- Head of Laboratory Molecular Dermatology, Department of Dermatology, University Freiburg
